

CapillaryConcrete

You have never seen anything like this, watch the full blow-up from the drone!

Click on the picture to watch the full blow-up renovation of one of the most prestigious clubs in Miami area - filmed, edited by Eric von Hofen and crew at Riviera CC

Riviera CC in Coral Gables using drones with cameras to record progress of renovation with Capillary Concrete

Superintendent **Eric J. von Hofen** with assistants **Matt Dauphinas** and **Tim Williamson** the renovation of the prestigious **Riviera CC** in Coral Gables, Florida. This project is one of the most thorough and radical renovations you have ever seen in a residential community. Installing Capillary Concrete in all bunkers is just one of the many tasks undertaken to make this golf course one of the best conditioned in Florida for decades to come. Eric and his crew works with **Quality Grassing** to upgrade everything possible to achieve the highest quality, and renowned architect **Kip Schulties** is responsible for the restoration of the original design intent in a new

"Capillary Concrete is the right product for our renovation" Eric J. von Hofen, GCS Riviera CC

and strategic fashion. This is going to be a real gem in a few months time and one of the absolute best private club golf courses in the USA. Be sure to follow the extremely cool [drone videos](#) of the renovation on Youtube

Assistant Superintendents Matt and Tim with the drone used by the team to record all progress of renovation weekly.

The handling of the drone takes some time to learn, but the results are stunning. Very popular with the membership and a great way to keep track of all activities going on in the renovation. Be sure to subscribe to the Youtube channel [Riviera Reno](#).

Golf National team preparing for the event of a life-time

GCS [Alejandro Reyes](#) at [Golf National](#) in Paris with parts of his team of Greenkeepers going through the plans for the on-going renovation of the championship course. This team is as diverse as the eventual [Ryder Cup Team](#) of Europe most likely will be with many great Greenkeepers having joined up in Alejandro's team to get this very unique experience of being part of the making of a [Ryder Cup golf course](#). They work hard every day and the results are starting to show - this will be the most spectacular Ryder Cup site ever in Europe, there is no doubt about that!

Strength, functionality and installation practices of Capillary Concrete demonstrated with models that very clearly shows the benefit and difference in using a high-quality product like Capillary Concrete.

Now is a great time to start - click and save!

Click [here](#) to receive our special promotional offer of special installation - when you try Capillary Concrete for the first time!

More and more Capillary Concrete going in specified in renovation projects, and numbers continue to grow - why? Capillary Concrete is the strongest and it works. [Order now!](#)

"..45 bunkers/10 hours per week..."

Capillary Concrete™ selected for strength

"Its a game-changer.."

**Agne Strom, CM Gamle
Fredrikstad Golf Club**

"After almost 3 problem-free seasons and 2 winters I can report 0 damage to the Capillary Concrete. I strongly recommend this product. Never a wash-out. I use about 10 hours a week to maintain 45 bunkers".

The Ryder Cup 2018 is being held at [Golf National](#), Paris, France. GCS Alejandro Reyes states the unique [homogenous bonding](#) is key to the exceptional strength of [Capillary Concrete™](#) and a very important reason why Capillary Concrete was selected for this honorable project.

Southern Hills CC, Tulsa OK and Capillary Concrete with drip-line system installed at this Major Championship venue, watch the [video](#) that explains the principle of enforced edge combined with the drip-line system. *"Its a game changer..."* **John Wagner**, GCS at Southern Hills CC.
