

Capillary Concrete Insured Financial Guarantee Instructions

Thank you for selecting Capillary Concrete for your bunker project!

For added protection and peace of mind, Capillary Concrete offers a 10-year guarantee provided by a Lloyds of London insurance syndicate. In order to take part in the IFG, the following conditions must be followed. Furthermore, this document must be read carefully and the fields for signatures below must be signed and then sent back to Capillary Concrete.

To obtain this insurance, the insured must meet the following conditions:

1. Appoint a person who is responsible for the installation and that it is done according to regulations and instructions and who will submit the installation approval as described below. This must be done before the installation can start.
2. The installation must be carried out exactly as specified in the installation instructions found on the Capillary Concrete website; [The Capillary Concrete Bunker Specification and installation guidelines.pdf](#)
3. Conducted tests;
 - a. After the Capillary Concrete has been allowed to cure for at least 24 hours and it has been cleaned according to the instructions, carefully check that the surface is smooth and that there are no areas anywhere in the bunker where the material is loose in any way.
 - b. During the water test-Make sure the entire surface drains perfectly and that there is no standing water anywhere in the bunker. Please watch this video: [Video show the drainage test](#) The insurance will not commence until the water drainage test is confirmed
4. The policyholder must submit an installation declaration on website <http://www.capillaryconcrete.com/bunker-installation-program/> containing the following information;
 - a. End user manager name, phone number and email address
 - b. Client/Project Name, Project Address, Project City, Project State, Project Zip
 - c. Installation Description (Bunker-, Tee-, Green- or Other installation)
 - d. Hole number, how many bunker at this hole and total Square Feet installed (or square meter) at this hole
 - e. Date Installation Completed
 - f. Temperature during installation (Fahrenheit or Celsius)
 - g. An installation approval that the installation is tested, accepted and approved by the end customer.

Please inform us, by filling in below who is the designated person who will be responsible for the end customer and is responsible for the installation is done according to regulations and instructions and to leave the installation approval after installation is done at our web declaration:
